5/8" X 9.5" X RL UP TO 82.75"

Introducing a reinvented classic. Bella Citta's PRIME Series further defines the luxury wood floor category with advancements in harvesting, coloring, consistency, and technology. Harvested only from certified French forests, PRIME Series French Oak offers features that generically labeled "European Oak" simply cannot provide. A 300 year history of stringent harvesting leads to a consistent supply of lumber allowing this new pallet of complex colors to be duplicated time and time again. Advancements in finish technology offer an extreme matte, real wood feel without the need to ever oil the floor.

Montvendre

PRIME GRADE FRENCH WHITE OAK

- Prime Grade allows only occasional, very small knots, with minimal sapwood
- The lowest 8' portion of the French Oak trees are used to make red wine and bourbon barrels. PRIME uses the next 8'

EUROPEAN STYLING, NATURAL COLORS

- Fumed and Lime-Washed for a timeless look. Rich color emerges due to high tannin content in White Oak grown north of the Alpes mountains
- Lifetime Coating System with "Extreme Matte" Finish (7%) enhances the wood grain. The look of an oil finish without the maintenance
- Minimum of 3 full length planks per carton. Min. avg. length per carton is 55" or longer
- Extra wide: 9-1/2" planks
- 4-sided beveled edge (3/32")
- Wire brushed

LIVE SAWN FOR NATURAL FEATURES

- Traditional European "live sawn" uses the entire log. This produces quarter sawn, cathedral graining, and natural variations to create the character seen in historic French châteaux

ECO-FRIENDLY

- 300 year history of sustainable forest management
- Harvested only at full maturity from verified managed growth forest
- CARB II and PEFC certified
- Contributes to LEED credits
- Free of Urea Formaldehyde
- Fumed (smoked) finish for natural colors without stain
- California Prop 65 Certified

HIGH QUALITY & HIGH VALUE

- Crafted with precision Italian machinery
- Cold press lamination takes longer to cure but results in more durable, stable planks
- Priced well compared to Euro made. The hardwood used for the product's core is almost as dense as the French Oak layer which provides for an overall denser product than other products using a softwood core
- Full 4mm hardwood surface. Even a 3/4" solid wood floor can only be sanded to the depth of the nail or tongue. The depth of 5/8" PRIME's surface layer is comparable to solid wood and can be sanded up to three times
- PRIME Wide Plank Flooring features a strong 3-ply cross-grain construction. This design resists shrinkage, expansion and warping from seasonal changes. A hardwood core enhances stability

EASY TO INSTALL

- Glue down, Staple down, or Floating
- Great for condos and radiant heated floors
- Radiant heat compatible (up to 83°F)
- Urethane adhesives for glue down

EASY TO MAINTAIN

- No oil or wax maintenance
- Simply sweep, vacuum or dry mop
- Recoatable and repairable with Bona products

WARRANTY

- Lifetime Structural Warranty
- 50 year Residential Surface Warranty
- 5 year Light Commercial Surface Warranty
